Healthy Start Monitoring and Evaluation Data System (HSMED) Reports Dashboard

This page was updated on December 16, 2022 and May 26, 2023.

General Information

The mission of the Maternal Child Health Bureau (MCHB) of the Health Resources and Services Administration (HRSA) is to provide national leadership and to work in partnership with states, communities, public-private partners, and families to strengthen the maternal and child health (MCH) infrastructure, to assure the availability and use of medical homes, and build knowledge and human resources to assure continued improvement in the health, safety, and well-being of the MCH population.

The Bureau currently administers a web-based electronic information system for Healthy Start grant recipients – the Healthy Start Monitoring and Evaluation Data (HSMED) System. HSMED supports 101 Healthy Start grantee organizations across the United States. The Healthy Start Monitoring and Evaluation Data System (HSMED) Reports Dashboard aggregates data from the HSMED and resides within HRSA's Electronic Handbooks (EHBs).

The purpose of the Healthy Start Monitoring and Evaluation Data System (HSMED) Reports Dashboard is to assist grantees in monitoring the number of participants they serve, progress toward program performance measures, the completeness of data collection with each participant, and the linkages between primary participants and children enrolled in Healthy Start.

The Healthy Start Monitoring and Evaluation Data System (HSMED) Reports Dashboard information is distributed across the following dashboards:

- Performance Measures (PM)
- Performance Measures (PM) Detail
- Participants Served
- Data Collection Detail
- Participant Linkages

The dashboards include near real-time data (with a 24-hour delay). Data in the dashboard is intended for grantee use only. If you have questions regarding the dashboards, please contact HealthyStartData @hrsa.gov.

 Note: The Recipient filter on these dashboards provides the option to filter for "All". For dashboard users associated to just one grantee organization in EHBs, selecting "All" will display the dashboards for the same organization they're associated to. For dashboard users associated to multiple organizations (such as Healthy Start system vendors), selecting "All" will display the aggregated counts and data for all the organizations that the grantee is associated to. Please note, the intent of these dashboards is to view data for individual recipients, and not the aggregated totals for multiple organizations. Permission to view a grantee's dashboard data is granted by the grantee's Project Director as identified in the latest Notice of Award.

Dashboard Key Features

The key features for these dashboards are:

1. Aggregated participant counts and demographic information
2. Performance Measures/Benchmarks calculations
3. Tools for monitoring participant data collection and reporting
4. Reports are generated using near-real time data with a one-day lag

Performance Measures (PM) Overview

The Healthy Start program has established benchmarks and goals for performance.

The purpose of the Performance Measures dashboard is to present an overview of grantee's 16 Performance Measures, and the Healthy Start benchma improvement efforts. Summary cards with details on how each Performance Measure is calculated and the counts are also provided.

All performance measure calculations include only "active" participants in the reporting year.

In the case of women participants, a participant is considered as active based on the Primary Participant Enrollment Date in the reporting year (calendar form.

In the case of child participants, a participant is considered as active based on the Child Enrollment Date in the reporting year (calendar year) Or Other U

The dashboard includes Recipient filter and multi-select filters for Reporting Year and Reporting Month served.

MORTARS GODDARD INC.   (All)   (All)   Reset

Disclaimer: Dashboards include near real-time data and are intended for grantee use only. If you have questions regarding the dashboards, please contact HealthyStartData@hrsa.gov.
Instructions: Use the drop-down menu to select individual Performance Measures and see the counts for each measure in the summary cards. Click on the summary card to create a tooltip link to the Performance Measures Detail dashboard, which provides participant responses for the selected measure.
Note: The Performance Measures metrics are defined by the Healthy Start Benchmarks Data Dictionary (revised December 2020), and are calculated using the data stored in the Healthy Start Monitoring and Evaluation Data System (HSMED). Summary cards with no values or '-' indicate that no participants met the inclusion criteria for that given Performance Measure.
The table below will display blank or '-' (i.e., no information) if there is no data applicable, and 0.00% when the metric calculation returns zero to the corresponding filter(s) applied.

Performance Measures (PM) Summary Cards

Dashboard summary cards indicate the numerator, denominator, and percentage calculations for each Performance Measure.

The summary card information is dependent on the selected Performance Measure filter. They will identify the values used to determine Performance Me

On the Performance Measures Dashboard, we consider all the women participants in the denominator whereas the Participants Served Dashboards only determined. If the key dates used in the calculation are missing, the participant is excluded from the calculation.

The drop-down menu in the 'Performance Measure' filter can be used to select individual Performance Measures and see the counts for each measure i the Performance Measures Detail dashboard, which provides participant responses for the selected measure.

Select Performance Measure
1a. Women with health insurance

Performance Measure - 1a. Women with health insurance

Performance Measures (PM) Table

Performance Measures Table:

This table provides an overview of all the Performance Measure percentage values for the selected recipient and dates, and the Healthy Start desired benchmarks for each Performance Measure.

'N/A' represents the related question does not have a response that clearly fits the don't know/declined context.

The table also provides the percentage values of the participant responses that are 'Don't know', 'Declined', and 'Missing'. These columns help to identify areas where data collection or entry issues may affect the overall outcome of a performance measure.

Data can be downloaded by clicking on each performance measure in the table.

Performance Measures (PM)			
Performance Measure Name	PM %	% of Don't know/Declined	% of Missi
1a. Women participants with health insurance	97.8%	0.0%	0.
1b. Child participants with health insurance	98.9%	0.0%	0.
2. Women participants with a reproductive life plan	52.2%	27.5%	1.
3. Women participants who received a postpartum visit	54.7%	0.0%	2.
4a. Women participants with a usual source of medical care	71.7%	0.0%	23.
4b. Child participants with a usual source of medical care	98.9%	1.1%	1.
5. Women participants who received a well-woman visit	95.1%	2.7%	1.
6. Child participants placed to sleep following safe sleep practices	81.4%	2.3%	0.
7. Child participants who were ever breastfed	85.9%	0.0%	0.
8. Child participants who were breastfed at 6 months of age	38.9%	0.0%	0.
9. Prenatal women participants who abstained from smoking during the last 3 months of pregnancy	78.6%	6.0%	0.
10. Women participants who conceived within 18 months of a previous birth	75.0%	0.0%	0.
11. Child participants who received their last recommended well child visit	98.9%	N/A	0.
12a. Women participants screened for depression	94.9%	N/A	5.
12b. Women participants who screened positive for depression and received a referral for follow-up services	52.9%	N/A	20.
13. Women participants who received intimate partner violence screening	95.7%	0.0%	0.
14. Prenatal women participants who report supportive father and/or partner involvement	78.6%	0.0%	0.
15. Child participants <24 months whose mother reported supportive father/partner involvement	78.0%	2.2%	0.
16. Child participants aged 6-23 months who are read to 3 or more times per week	72.7%	6.1%	0.

Note: The aggregate measures are based on the Aggregate Data User Guide and Data Dictionary. Number of New Participants is based off Enrollment Date, while Number of Unduplicated Participants Served accounts for any and all screening/re-screenings in the selected reporting using the HS Data Collection Forms. The summary cards and tables below will display blank (i.e., no information) if there is no data applicable, 0 when the metric calculation returns zero to the corresponding filter(s) applied.

Newly Enrolled Participants Summary Cards

Dashboard summary cards indicate the number of newly enrolled participants served during a reporting month, broken out into 6 populations:

- Men
- Pregnant Women
- Non-Pregnant Women
- Infants 0-12 months old
- Children 13-17 months old
- Total

Number of New Participants					
Men	Pregnant Women	Non-Pregnant Women	Infants 0-12 Months	Children 13-17 Months	Total
25	83	49	398	62	617

Summary cards are organized by participant type and show Men, Pregnant Women, Non-Pregnant Women, Infants 0-12 months, Children 13-17 months

Unduplicated Participants Summary Cards

Dashboard summary cards indicate the total number of unduplicated participants served to date, broken out into 6 populations:

- Men
- Pregnant Women
- Non-Pregnant Women
- Infants 0-12 months old
- Children 13-17 months old
- Total

Summary cards are organized by participant type and display Men, Pregnant Women, Non-Pregnant Women, Infants 0-12 months, Children 13-17 mont

Number of Unduplicated Participants Served					
Men	Pregnant Women	Non-Pregnant Women	Infants 0-12 Months	Children 13-17 Months	Total
25	132	131	398	62	748

Participants Served Tables

Participants Served by Race: This table demonstrates the number of participants served by race, organized by participant type.

Number of Participants Served by Race							
	American Indian or Alaska Native	Asian	Black or African American	Multiple Race	White	Don't Know/ Declined to Answer	Tot
Men	0	1	9	7	8	0	
Pregnant Women	0	0	26	81	21	4	1
Non-Pregnant Women	0	0	26	81	20	4	1
Infants 0-12 Months	0	1	138	106	114	39	3
Children 13-17 Months	1	0	25	23	12	1	
Total	1	2	224	298	175	48	7

Participants Served by Ethnicity: This table demonstrates the number of participants served by ethnicity, organized by participant type.

Number of Participants Served by Ethnicity				
	Hispanic or Latino	Not Hispanic or Latino	Don't Know/Declined to Answer	Tot
Men	9	16	0	
Pregnant Women	48	84	0	1
Non-Pregnant Women	47	84	0	1
Infants 0-12 Months	181	216	1	3
Children 13-17 Months	18	44	0	
Total	303	444	1	7

Data Collection Detail Overview

The Data Collection Detail dashboard provides information on the completeness of a grantee's data, implementation of data collection, and metrics relate of this dashboard is to provide grantees with the ability to view individual participant records and see how many initial forms and form updates are compl on their form completion and updates.

Each row represents an initial form or an updated form.

The dashboard has filters for the Month and Year of Enrollment Date.

The Participant Status "Lost to follow-up" is calculated using participants who do not have Exit Dates and do not have initial forms or form updates compl to be "active" if they have an updated form or an initial form completed within a reporting year and do not have an Exit Date, or if they have an Enrollmen forms or initial forms completed and no Exit Date. Participants are determined to be "exited" if they have an Exit Date. Participants are determined to be " through Background Form question G8.

Some participants have no values in certain columns because they have not recorded an answer for the respective question(s) within the Data Collection indicates that the record is archived because a form update occurred containing more recent data for the participant. 'N/A' indicates that the Participant S entered for the participant.

The tables will display blank (i.e., no information) if there is no data applicable to the corresponding filter(s) applied.

Participant Linkages Overview

The Participant Linkages dashboard displays the linkages between primary participants, and between primary participants and any enrolled children. Use linkages, participants with linkages to other participants, participants with linkages to children only, and participants with linkages to both.

The purpose of this dashboard is to provide grantees the ability to view all PPUID and ECUID linkages, from parent to parent and parent to child, allowing accuracy.

The Enrolled Child ID indicates linkage to the Primary Participant ID only, not to the Linked Primary Participant ID. If a Linked Primary Participant ID is bl not have any linkages to other participants. If an Enrolled Child ID is blank, this indicates that the Primary Participant ID does not have any linkages to ch

The table below will display blank (i.e., no information) if there is no data applicable to the corresponding filter(s) applied.

The table will show all PPUIDs that are linked to each other as well as all ECUIDs that they are linked to.

Participant Linkages ?

This dashboard displays linkages between primary participants, and linkages between primary participants and children. For additional details, click '?' icon.

Data Collection Detail

This dashboard provides information on the implementation of the three Healthy Start Data Collection forms. It provides details on data collection by participant, such as the number of form updates, the recency of the forms, and the general status of the participant within the Healthy Start Program at the time of screening/re-screening. For additional details, click '?' icon.

| Select Recipient | Select Reporting Year | Select Reporting Month | Select Primary Participant ID | Select Participant Status |
| All | All | All | All | All |

Reset

Disclaimer: Dashboards include near real-time data and are intended for grantee use only. If you have questions regarding the dashboards, please contact HealthyStartData@hrsa.gov.
Instructions: Click the sort button in the top right of the column header to sort by a different column.
Note: Details on how the Participant Status is calculated can be found in the Wiki. Some participants have no values within certain columns due to the participants not having recorded an answer for the respective question(s) within the Data Collection Form. 'Archived' in the participant status column indicates that the record is archived because a form update occurred containing more recent data for the participant. 'N/A' indicates that the Participant Status cannot be defined as there have been no dates entered for the participant.
The tables below will display blank (i.e., no information) if there is no data applicable to the corresponding filter(s) applied.

Background Form

Grant Number	Recipient Name	Primary Participant ID	Enrollment Date	Initial Completion Date	Form Update Type	Form Update Date	Reason for Update	Exit Date	Reason for Exit	Participant Status	Form Status
